WELCOME

RPF Mining and Mechanical is proudly owned and run by qualified heavy machinery mechanic Ashley Wojtkiewicz (Wokas) and his team.

Ashley who started his career as a Mobile Plant Mechanic based in Kalgoorlie WA, quickly grew his skill set and knowledge through his passion for the job, dedication to learning and his constant strive for perfection.

Ashley has been in the mining industry for more than 20 years, working across Australia and around the globe. He has performed in multiple roles throughout the years such as field service technician, long hole operator and senior drill specialist for one of Australia's leading drill maintenance companies, where he spent many years honing his skills.

Ashley personally ensures RPF Mining and Mechanical delivers above and beyond client expectations.

ABOUT US

From humble beginnings, we have grown into an innovative team providing production drilling services, drill hire, maintenance support, along with training solutions.

At RPF Mining and Mechanical, we are an integral part of underground mining operations, managing the productivity and reliability of heavy machinery and delivering exceptional service to Western Australia's mining industry, in metro and regional locations – from Perth and throughout the golden mile.

We have drilling equipment available for hire from our Maddington workshop available for dispatch to locations all over Australia for all your short and long-term drilling programs.

Western Australia's premium drill experts, our team at RPF Mining and Mechanical are committed to providing specialised underground production and development drill maintenance, operation, and training across local and regional Western Australia.

As a small and nimble team, we work together to ensure you are receiving the very best quality and service. We are proven to provide excellent, reliable, and safe machinery and manpower on every job, every time.

Reach out today to request more information about our services or to speak with one of our drill and maintenance experts.

VALUES

INTEGRITY

We act with responsibility, trustworthiness and transparency.

INNOVATION

We encourage innovation to constantly create and improve.

PERFORMANCE

Setting goals and objectives in order to constantly cultivate performance.

COLLABORATION

Unlocking better teamwork by promoting clear communication, efficiency and positivity.

PASSION

Greater fulfillment in the contributions we make in and around the workplace.

OUR SERVICES

We believe in delivering great service with hard-working and reliable machines. At RPF Mining and Mechanical we offer core services that are the cornerstone to all West Australian mine sites. This includes drill hire, underground drilling, maintenance, operation and training.

Utilising the latest in drill mining technology, maintenance, and operations, we work with our clients to solve complex heavy machinery and maintenance problems while ensuring mines operate safely and efficiently.

PRODUCTION DRILLING

RPF Mechanical specialises in providing production drilling services, offering clients a comprehensive solution for equipment and operator needs. With a range of machinery available, RPF Mining and Mechanical ensures that our clients have access to the right equipment for their projects.

By providing skilled operators along with quality machinery, RPF Mining and Mechanical ensures efficient and safe operation.

Wet hire capabilities include the supply of;

- **Drill rigs (various sizes)**
- **Operators**
- **Mechanics**
- **Sea container equipped with 200k spare parts**
- **Ancillary equipment specific to the job requirements**
- **Long, and short-term contracts**

EQUIPMENT HIRE

As one of Western Australia's premium drill suppliers, we pride ourselves in delivering quality machinery backed up with our mechanical support team, so our customers can achieve their targets.

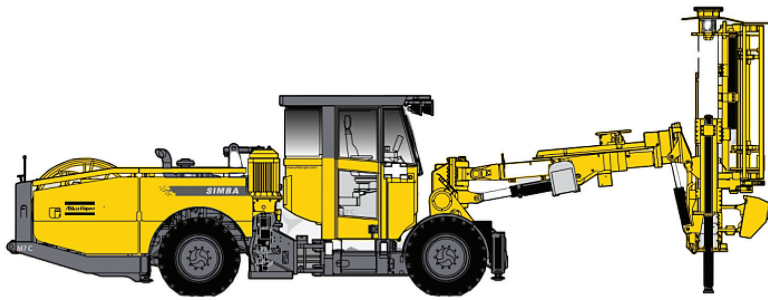

At RPF Mining and Mechanical, we focus on delivering client satisfaction by providing specialist equipment and drills for hire, across both local and regional Western Australia.

Our assortment of production and development drills provides a variety of options for your mining requirements. Whether you're after your standard or a more specialised drill – we've got you covered!

- **Atlas Copco Copco Simba M7C**
- **Atlas Copco Copco Simba L6C**
- **Atlas Copco Boomer H104**
- **Epiroc Simba E7C**
- **Light Vehicles**
- **Ancillary equipment**

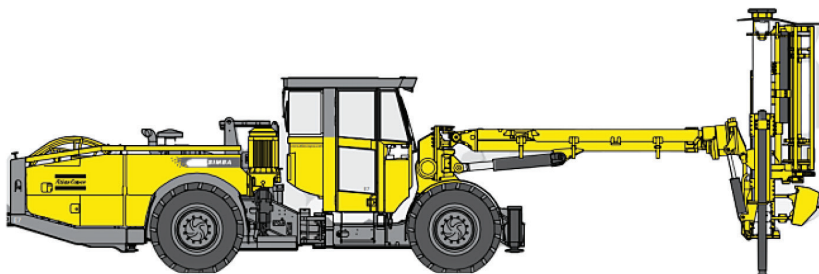

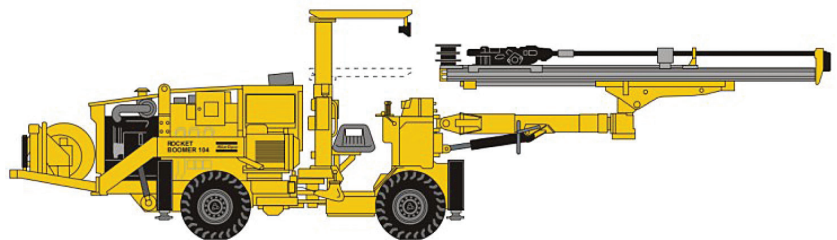

BENJI-01

Asset number: BENJI-01
Machine Make: Atlas Copco
Machine model: Simba M7C
Rock drill: 1838Mex
Hole size: 64-204mm
Carousel capacity: 1.8m rods x18
Total rod length: 32.4
Consumables: T45
Automation: RCS 4

DODGE-02

Asset number: DODGE-02
Make: Atlas Copco
Model: Boomer H104
Rock drill: 1838
Feed rail: Split feed or long hole
Consumables: T38

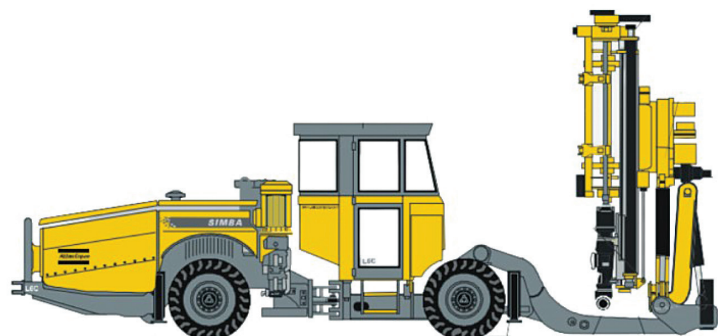

WILSON-03

Asset number: WILSON-03
Make: Epiroc
Model: Simba E7C
Rock drill: 3060
Hole size: 89-204mm
Carousel: 1.8m rods x28
Total rod length: 50.4
Consumables: T58-T68
Automation: RCS 4

DAVO-04

Asset number: DAVO-04
Make: Atlas Copco
Model: Simba L6C
Rock drill: 4050
Hole size: 89-204mm
Carousel: 1.8m rods x28
Total rod length: 50.4
Consumables: T58-T68
Automation: RCS 3

DRILLING OPERATORS – ONSITE

RPF Mining and Mechanical are a specialist production driller in Western Australia, providing a range of top hammer drill rigs to suit almost every underground production drilling requirement.

We provide fully qualified labour hire to operate drills in compliance with client specific work health and safety regulations. As regulated professionals, we take safety seriously and are committed to creating a workplace environment where the safety of our staff and customers is our number one priority.

MAINTENANCE – OFFSITE/ONSITE

We provide first class, reliable maintenance support for our clients in the forms of;

- Site servicing
- Hose manufacturing
- Minor and major repairs
- Machine rebuilds
- Rebuilding of service exchange components
- Diagnostics and repair
- Hydraulic tuning
- Field service and break down support
- 1000v testing in Perth

TRAINING – WORKSHOP BASED

We provide full range of maintenance training and operational support for all makes of underground drills.

Each package is tailored to a specific make and model of equipment – so no two packages are ever the same.

Our Packages consist of:

- Site based mechanical/hydraulic/electrical training
- Class based courses, practical and theory
- EPIROC RCS diagnostics and training
- Long hole operations training
